GainSide™
Cybersecurity & IT Simplified

Simplified Cybersecurity and MSP Solutions

Industry-Leading Protection for Cyber Readiness

GainSide specializes in providing cybersecurity solutions and managed IT services, adopted by Fortune 500 companies at affordable subscription pricing. Our cyber experts ensure you stay ahead of existing and emerging cyber threats by defending your networks, email, and users.

It's a dangerous digital landscape

- Global cost of cybercrime is expected to surge from $14.6 trillion in 2024 to almost $24 trillion by 2027
- 50% of small businesses think they are too small for a cyberattack, but over 75% of all attacks target small businesses
- 60% of small companies close 6 months after being hacked
- 80% of those who paid a ransom experienced another attack, while only 46% regained access to their data following payment, but some or all of the data was corrupted

Industry leading solutions

Secure Internet Access	Email/Information Protection	Drive/Email Backup
CISCO Umbrella	proofpoint.	Acronis
Protects your users from threats on the internet	Protects your users from threats in email	Keeps your data protected

ESET	usecure	Miradore
AI-powered anti-virus	Gap analysis and user training	Device management in a single platform
1 Billion+ Protected Internet Users	100K+ End-Users Educated	900K Registered Devices

Top user threats we defend against

1. Phishing
2. Ransomware
3. Malware
4. Insider threats
5. Cyber espionage
6. Man-in-the-Middle attack (MITM)
7. Distributed Denial of Service (DDOS) attack

Most companies think they are protected, but have a false sense of security. Most IT teams and MSPs are NOT experts in cybersecurity risks due to the constantly evolving landscape. With the increase in emerging threats, someone dedicated to cybersecurity is critical to mitigating the risk.
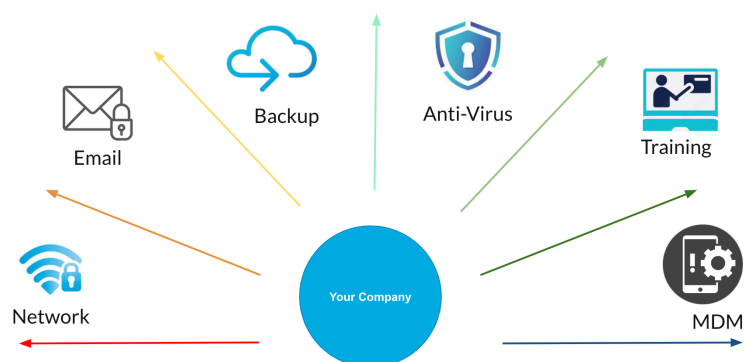

However, most companies are maintaining current levels of staffing or making reductions--so creating a new role internally is challenging. GainSide can serve as your dedicated resource for managing the increased risks and ensure you're protected.
